## PUBLIC SERVICE ANNOUNCEMENT:

### COVID-19 Outbreak Declared Over for Flying Dust Health/Administration Center

**Wednesday, January 6, 2021 10:00HRS**

Northern Inter-Tribal Health Authority (NITHA) is ending the coronavirus (COVID-19) outbreak declared for Flying Dust Health/Administration Center on December 12, 2020. Dr. Nnamdi Ndubuka, Medical Health Officer with NITHA, has declared the outbreak over after the standard 28-day period has passed after the onset of the last case that had the potential to contribute to transmission in Flying Dust First Nation.

This does not mean there are no cases in the community. The public is reminded that during the COVID-19 pandemic it is important to continue to take precautions to protect yourself, your families and everyone who lives in the community. COVID-19 is present in Saskatchewan and we all have a responsibility to minimize the spread of the disease. Masking in all indoor public spaces and physical distancing should be done all the time, to reduce the spread of COVID-19.

It is also important for everyone to follow the public health guidelines for hand washing, physical distancing, self-monitoring and self-isolating to reduce the spread of COVID-19 and protect our most vulnerable populations. Together we can make a positive difference in our community by reducing the spread.
