

Northern Inter-Tribal Health Authority Inc.

PUBLIC SERVICE ANNOUNCEMENT

August 14, 2020

The Northern Inter-Tribal Health Authority public health officials wants you to know that Syphilis is on the rise. Syphilis is a highly transmissible sexually transmitted infection that can cause very serious health problems if it is not treated. It is curable. You are at risk of getting syphilis if you have multiple sexual partners, engage in unprotected sex, or use alcohol/drugs. Syphilis can be transmitted from mom to baby during pregnancy or delivery. Reduce the risk. Get tested. Practice safe sex. Talk to your community health nurse about testing and treatment. Like NITHA on Facebook.
