

HIV Testing Day Summary 2023

Community-based organizations across Saskatchewan coordinated the first province-wide HIV testing day on June 27, 2017 in response to high rates of HIV infection in the province. The initiative garnered national attention and is now observed across Canada as *National HIV Testing Day* with the purpose of promoting and offering HIV testing to educate, reduce stigma, and normalize HIV testing.

Saskatchewan hosted its **5th annual** province-wide HIV Testing Day.*

The Saskatchewan Minister of Health proclaimed **June 27, 2023** to be the **“National HIV Testing Day”** in Saskatchewan.

*Due to pandemic restrictions, there was no Saskatchewan HIV Testing Day in 2020 and 2021.

Each year, targeted “testing fairs” and awareness events are organized throughout the province by community-based organizations in collaboration with the Saskatchewan Health Authority (SHA), First Nations Inuit Health Branch (FNIHB), and the Northern Inter-Tribal Health Authority (NITHA).

In **2023**:

- **15 HIV testing and awareness events** happened in **12 locations** across the province.
- **Approximately 1,130 people attended** these events.
- **244 people were tested** for HIV.
- **94 HIV self-test kits** were distributed.

* RRPL Tests – Roy Romanow Provincial Laboratory Tests

PoC Tests – Point-of-Care Tests

DBS Tests – Dried Blood Spot Tests (data only available starting in November 2018)

HIV is different now.

Testing for HIV is simple, and prevention and treatment are better.
